

LAWSON HEALTH RESEARCH INSTITUTE

Lawson Health Research Institute (Lawson) is the research institute of London Health Sciences Centre and St. Joseph's Health Care London.

For more than thirty years, Lawson Health Research Institute in partnership with Western University has been driving innovation and helping transform health care. As one of the ten largest hospital-based institutes in Canada, we are partners on over 600 research projects annually and have more than 2,500 active clinical trials with over 8,000 clinical subjects enrolled.

Within the Institute, a “bench to bedside” approach to medical research is encouraged. This means our researchers focus their efforts on the development of new knowledge that can be applied directly to patient care within the hospitals. Through collaboration and the sharing of their discoveries, Lawson researchers make a difference in patients' lives every day.

Research at Lawson expands the continuum of life - from birth to death - and this is reflected in the research themes that mirror the clinical areas of LHSC and St. Joseph's.

Research at Lawson includes:

- Cancer
- Children's Health
- Clinical Investigation and Therapeutics
- Cognitive Vitality and Brain Health
- Critical Illness
- Diabetes and Endocrinology
- Imaging
- Mental Health
- Microbiome and Probiotics
- Mobility and Rehabilitation
- Neurological Disorders
- Personalized Medicine
- Surgical Innovation
- Transplantation
- Vascular Health and Chronic Disease
