Department Name

Lawson Health Research Institute (Lawson) is the research institute of London Health Sciences Centre and St. Joseph's Health Care London. As one of Canada's top ten research institutes, we are committed to furthering scientific knowledge to advance health care around the world.

As a member of the Lawson Clinical Research Services team, the Research Assistant will collaborate with Investigators and health care teams to assume responsibility for the overall patient management and coordination of several clinical studies. Studies may include all programs supported at the city wide sites for LHSC and SJHC. They will include industry-sponsored, cooperative group sponsored (such as CIHR) as well as Investigator initiated trials. **This position will provide an excellent opportunity for a dynamic individual with demonstrated organizational and communication skills.**

Responsibilities include, but are not limited to, study start up, recruitment of study participants (e.g. identify and screen potential subjects, obtain informed consent); coordination of patient visits schedules as per study protocol; execution of all aspects of study visits (e.g. assessment adverse events, monitoring safety, medication, questionnaires, sample collection, (may including processing and shipment of samples according to clinical protocol), provides clinical care for patients participating in clinical trials and the implementation and coordination of all aspects of data collection and source documentation, as per LHSC policy and ICH/GCP guidelines. This position will require professional communication both written and verbal between all clinical trial stakeholders.

Rate of Pay: To commensurate with experience

Hours of Work: Casual

Duration: 1 year contract (with possibility of extension)

Qualifications

- Successful completion of Bachelor's Degree in Health Sciences or related field of study
- Minimum 3 years recent related experience in clinical trials research is an asset
- Diploma or Certificate in Clinical Trials Management preferred or plan to work towards
- Phlebotomy skills and lab processing skills preferred
- Up-to-date knowledge of and experience with GCP guidelines, regulations, privacy legislation, research ethics board
- Experience with clinical study start-up, and research ethics submission an asset
- Current research training for Lawson SOPs, TCPS2 and Privacy an asset
- Designation with SOCRA or ACRP an asset
- Certification in Transportation of Dangerous Goods and IATA An asset
- knowledge of clinic, hospital, procedures and policies an asset
- Excellent record keeping skills and experience with database management
- Working knowledge of computer applications and software packages
- Demonstrated organizational and analytical skills
- Excellent interpersonal/communication skills (both oral and written) and a high level of initiative
- Ability to work effectively both independently and as part of a team
- Demonstrated knowledge of and commitment to patient and staff safety at LHSC
- Demonstrated ability to attend work on a regular basis

London Health Sciences Centre fosters a culture of patient and staff safety whereby all employees are guided by LHSC's Mission, Vision, Values, and Code of Conduct.

We are committed to providing a safe, healthy and inclusive work environment that inspires respect. LHSC encourages applications from persons with disabilities and we are committed to providing accommodations upon request.

Your interest in this opportunity is appreciated. Only those applicants selected for an interview will be contacted. Successful candidates, as a condition of job offer, would be required to provide a satisfactory police information check (original document) completed in the last 3 months.
