Department Name

Lawson Health Research Institute

Reporting to the Research Informatics Project Manager, Lawson Health Research Institute (Lawson), the Software Developer is responsible for analysis and conversion of project requirements into detailed requirements, design documents, software code and working application. The incumbent will interact and communicate efficiently with diverse teams of people including researchers, coordinators, and other team members.

The Software Developer/Engineer must understand business requirements and will develop new projects. The successful incumbent will also provide enhancements and support existing applications, design components within a web-based application using object-oriented methodology, create technical documentation throughout the entire Software Development Lifecycle and support Web and Database server administration. The Software Developer/Engineer will work in a team environment using a development process and will be assigned other duties as required.

Rate of Pay: To Commensurate with experience

Hours of Work: 37.5 hours per week
